

TABLE 2 ENERGY STAR 1.1 CRITERIA

Energy efficiency for active mode	
Nameplate-output power (P_{NO})	Minimum average efficiency in active mode
0 to 1W	$\geq 0.49 \times P_{NO}$
>1 to 49W	$\geq [0.09 \times \ln(P_{NO}) + 0.49]$
>49W	≥ 0.84
Energy consumption for no-load mode	
Nameplate-output power (P_{NO})	Maximum power in no load
0 to <10W	0.5W or less
10 to 250W	0.75W or less
